INSULATION FACT SHEET

SES FOAM 1 LB SPRAY

SES Foam 1 lb Spray is an open-cell, nominal one lb/ft³ density, water-blown spray-applied polyurethane foam for use as thermal insulation and air barrier. This insulation must be applied by applicators approved by SES Foam using high pressure, plural component spray equipment.

R* Value

Thickness (inches)	R Value (EF•hr•ft ² / Btu)
1	4.1
3.5	13

*As with all insulating materials, the R value will vary with age and use conditions.

Read This Before You Buy

What You Should Know About R-values

The chart shows the R-value of this insulation. R means resistance to heat flow. The higher the R-value, the greater the insulating power. Compare insulation R-values before you buy.

There are other factors to consider. The amount of insulation you need depends mainly on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, and your fuel use patterns and family size. If you buy too much insulation, it will cost you more than what you'll save on fuel.

To get the marked R-value, it is essential that this insulation be installed properly.
